

**List of motorcycles for test under 3rd Directive from 19/01/2013**

The requirements for motorcycles used for test (minimum test vehicles or MTV) are:

Category A1: Motorcycle without side car, must be at least 120cc and no more than 125cc, power not to exceed 11kw (14.6bhp), Capable of at least 90km/h (55mph).

Category A2: A motorcycle without side car, of at least 395cc with a power output between 25 and 35 kW (33bhp and 46.6 bhp). No upper engine size limit, but the power to weight ratio must not exceed 0.2kW/kg and it must not be derived from a motorcycle of more than double its power (i.e. less than 70 kW).

Category A: Motorcycle without side car, must be at least 595cc with a power output of at least 40kw or (53.6bhp).

Different requirements may apply to disabled riders.

For category AM and A1 DSA will accept all 'learner legal' machines for test unless there's clear evidence they don't meet the minimum test vehicle requirements.

For category A2 & A DSA will accept evidence from manufacturers or official importers that a specific model of motorcycle meets these requirements and will publish this information where it applies to a number of machines of a specific type.

For machines not on this list or where an individual machine has been restricted to comply with the minimum test vehicle requirements it will be accepted for test providing certified proof of compliance or restriction is available for the examiner.

| <b>Manufacturer</b> | <b>Model name</b>       | <b>Category</b> |
|---------------------|-------------------------|-----------------|
| Husqvarna           | NUDA 900                | A               |
